SO, WHAT IS NXT?

Elevate NXT is the next step in promotional apparel. With the garments & bags of Elevate NXT, we follow the supply chain from the source to the branding. Made of GRS certified recycled polyester or GOTS certified organic cotton, our Elevate NXT styles are truly sustainable. And of course, they have all the qualities you have come to expect from an Elevate product: designed for branding and super comfortable to wear.

And as we believe that the branding on a product is as much a part of it as the buttons or the zipper, Elevate NXT products are only offered including branding. The inks used for the branding are certified too! The inks/yarns used are sustainable and free of any harmful chemicals - meaning they do not contain hazardous substances for humans. Available in five popular promotional colours and our special Elevate NXT blue, this really is the next step in promotional apparel: certified from yarn to inks!

The GOTS –Global Organic Textile Standard– is the worldwide leading textile processing standard for organic fibres. This standard also includes ecological/environmental (f.e. energy, water, wastewater and chemical use) and social criteria. The entire textile supply chain is backed up by an independent certification and traceability is key in this process.

The Global Organic Textile Standard aims to define worldwide recognized requirements that ensure the organic status of textiles. From harvesting of the raw materials through environmentally and socially responsible manufacturing up to labelling – in order to provide a reliable assurance to the end consumer.

With one certification accepted in all major markets – textile processors and manufactures are enabled to export their organic yarns, fabrics and garments.

WHAT IS GRS?

The GRS –Global Recycled Standard– is an international, voluntary full product standard that sets requirements for third-party certification of recycled content, chain of custody, social and environmental practices and chemical restrictions.

The standard aims to meet the needs of companies looking to verify the recycled content of their (both finished and intermediate) products. Also GRS is intended to verify responsible social, environmental and chemical practices in their production.

To define requirements that ensure good working conditions and accurate content claims as well as minimizing harmful environmental and chemical impacts, are the objectives of the Global Recycled Standard. In more than 50 countries this includes companies in ginning, spinning, weaving, knitting, dyeing, printing and stitching.

WHAT IS OEKO-TEX®?

Applications

OEKO-TEX®
CONFIDENCE IN TEXTILES
STANDARD 100
1308024 Centexbel

Tested for harmful substances.
www.oeko-tex.com/standard100

A textile item that includes the OEKO-TEX® STANDARD 100 label ensures that every component of the article has been tested for harmful substances. All textile articles, starting from the threads to the finished fabrics and finished items (in every stage of processing), are suitable for a STANDARD 100 certification. Every single component and ingredient will be tested by the OEKO-TEX® partner institute according to a modular system before the final article is allowed to carry the label. This includes threads, buttons, zippers, lining, but also prints and coatings applied to the material. Therefore it is certain that the article is harmless in human ecological terms and safe for human use. Product carrying the OEKO-TEX® STANDARD 100 label signal trust.

The official test is conducted by the independent OEKO-TEX® partner institutes and follows the basis of the extensive OEKO-TEX® criteria catalogue. In the test they take into account numerous regulated and non-regulated substances, which may be harmful to human health. The limit values for the STANDARD 100 go beyond national and international requirements in many cases.

WHAT IS BSCI?

amfori BSCI is part of amfori, the leading global business association for open and sustainable trade. It enables its members to enhance human prosperity, use natural resources responsibly and drive open trade globally. amfori calls this Trade with Purpose.

In a global marketplace, supply chains are becoming increasingly complex. It's now more necessary than ever for companies to improve visibility over their production – and to drive improvements across their supply chains wherever possible. Since 2003, amfori BSCI has enabled companies to trade with purpose by improving social performance in their supply chain.

amfori BSCI is open to all retail, brands and importing companies committed to improving working conditions in the global supply chain. The system provides companies with a social auditing methodology, and a reporting and remediation system in order to follow the process of continuous improvement.

amfori's strong code of conduct has 11 principles that support the members. These range from fair remuneration to no child labour, along with a step-by-step approach that enables companies to monitor, engage, get empowered and receive support to put sustainable trade at the heart of their business.

BENEFITS-BY TAKING PART IN AMFORI BSCI MEMBERS CAN:

- **Improve the social performance of their supply chain**
- **Reduce cost and increase efficiency**
- **Have a clear and consistent approach that highlights best practices**
- **Improve the resilience of their business to industry and market changes**
- **Improve their businesses' reputation by meeting the expectations of your customer and stakeholders**

Member of amfori, the leading global business association for open and sustainable trade. We improve the social performance of our supply chain via amfori BSCI.

BRANDING ON ELEVATE NXT?

Elevate NXT is the next level in promotional and corporate apparel with GOTS/GRS certified garments and bags that will be decorated with certified branding techniques. Elevate NXT gives the assurance that both product and branding are certified. The objective is to sell a 100% certified sustainable promotional product from raw material to printed logo. All Elevate NXT items will be decorated with GOTS (or GRS) certified inks or threads. The inks/threads used are sustainable and free of any harmful chemicals – meaning they do not contain hazardous substances for humans.

To assure that the sustainability of the garment or the bag is guaranteed Elevate NXT is only available including branding.

The certified branding techniques available for Elevate NXT styles are Screenprint, Transfer and Embroidery.

For Screenprint and Transfer we use special GOTS/GRS certified inks. These inks are environmentally friendly, containing no hazardous substances for humans. For Embroidery we use GRS certified recycled polyester yarn.

A man and a woman are posing for a photograph. The woman, on the left, has long blonde hair and is wearing a dark navy blue V-neck t-shirt. The man, on the right, has short dark hair and a light beard, and is wearing a white V-neck t-shirt. They are both smiling slightly at the camera. The background is a light-colored, textured wall. On the far left, there is a logo consisting of three stacked squares above the word "ELEVATE" in a bold, sans-serif font, with "NXT" written in smaller letters above it.
